

December 7, 2023

The Honorable David S. Johanson
Chairman
U.S. International Trade Commission
500 E Street SW
Washington, D.C. 20436

Dear Chairman Johanson:

We write in regard to the remand decision ordered by the U.S. Court of International Trade (CIT) to the U.S. International Trade Commission (ITC) for duties on phosphate fertilizer imported from Morocco (Consol. Court No. 21-00219). As farmers continue to experience high costs and supply challenges for fertilizer inputs, our organizations hold deep concern for actions that restrict availability of phosphate into the U.S. market. We urge the ITC to consider impacts on family farms as it works to reconsider its determination of material injury to domestic industries.

Rising prices for fertilizer inputs have strained America's farmers and ranchers and have impacted availability for this critical component of nutrient and yield management. Without predictable options to source this product, farmers struggle to plan for the future. International supply chain issues further complicate the ability to source phosphate. For example, triple super phosphate is not available domestically but still faces a duty. Agriculture supply chains are intricate and complicated, and the premise that re-shipping product from an originally intended destination to respond to regional demand fluctuations is simply not correct. Instead, reliance on this incorrect premise has led to high fertilizer costs that create volatility and compromise the ability of farmers to be successful.

The ITC's affirmative injury determination in 2021 was appealed by the respondents, and several of our associations also submitted an amicus brief opposed to the determination. We understand that the CIT found that the ITC did not adequately consider factors that impacted the domestic supply when making their affirmative injury determination. The CIT further elaborated that the ITC's consideration of import increases in 2019 failed to take appropriate account for weather challenges that caused logistical hurdles and created a temporary mismatch between supply and demand in some parts of the country. Because the ITC did not consider the volume of imports in light of the regional impact of weather, the result was an injury determination without the necessary factual support. We urge the ITC to appropriately consider the issues raised by the CIT when developing their revised injury determination.

We understand that the Department of Commerce (Commerce) is also working on recalculating these duties, as the CIT found errors within their calculation process and remanded the case back to the agency. With impending decisions from Commerce and the ITC, our organizations simply want accurate consideration of the facts and impacts on American farmers. Farmers are the lifeblood of our food supply, contributing to our economic strength and the resilience of rural communities. When burdened with high input costs, farmers see ripple effects occurring in every

facet of their operation. This inhibits their ability to increase market access on the global stage and satisfy both local and regional customers.

We strongly urge the ITC to consider the points raised by the CIT in re-evaluating the material injury determination, as well as the impact on farmers. We are available to answer any questions and look forward to your forthcoming decision.

Sincerely,
